

IN THE CLAIMS

**Please amend the claims as follows:**

Claims 1-31 (Cancelled)

32. (New) A composition comprising

- a solids content defined by a dry solids extract of more than 45% of the total weight of the composition; and

- an adhesion profile  $PA_{20\%}/PA_{T0} \leq 2.5$ , where  $PA_{20\%}$  represents the adhesive power of the composition when 20% of the composition has evaporated and  $PA_{T0}$  is the adhesive power of the composition at the time at which the composition is applied.

- 33. (New) The composition according to Claim 32, wherein the solids content is greater than 50% by weight of the total weight of the composition.

- 34. (New) The composition according to Claim 32, wherein the adhesion profile is 0.05 to 2.5.

35. (New) The composition according to Claim 32, further comprising at least one fatty phase, said fatty phase comprising at least one structuring agent.

36. (New) The composition according to Claim 35, wherein the fatty phase represents from 10 to 60% of the total weight of the composition.

37. (New) The composition according to Claim 35, wherein the structuring agent is at least one selected from the group consisting of tackifying waxes, the combinations of at least one specific compound with at least one oil, and mixtures thereof.

38. (New) The composition according to Claim 37, comprising at least one tackifying wax having the following features:

- a tack  $\geq 0.7$  N.s, and
- a hardness  $\leq 3.5$  MPa.

39. (New) The composition according to Claim 37, wherein the structuring agent is a combination of at least one specific compound with at least one oil.

40. (New) The composition according to Claim 39, wherein the specific compound is selected from the group consisting of semi-crystalline polymers, fatty-phase rheological agents and mixtures thereof.

41. (New) The composition according to Claim 39, wherein the oil is selected from the group consisting of volatile and non-volatile hydrocarbon oils, silicone oils, fluoro oils, and mixtures thereof.

42. (New) The composition according to claim 39, wherein the oil has a molecular mass greater than or equal to 250 g/mol.

43. (New) The composition according to Claim 39, wherein the combination of a specific compound with at least one oil has:

- a tack  $\geq 0.1$  N.s. and
- a hardness  $\leq 30$  MPa.

44. (New) The composition according to Claim 40, comprising a combination of semi-crystalline polymer with at least one oil exhibiting a tack from 1 to 5 N.s and a hardness of from 0.1 to 20 MPa.

45. (New) The composition according to Claim 35, wherein the structuring agent represents from 10 to 60% of the total weight of the composition.

46. (New) The composition according to Claim 32, further comprising water and optionally one or more hydrophilic organic solvents.

47. (New) The composition according to Claim 46, comprising at least one hydrophilic organic solvent selected from the group consisting of monoalcohols having 2 to 5 carbon atoms, polyols having 2 to 8 carbon atoms, C<sub>3</sub>-C<sub>4</sub> ketones and C<sub>2</sub>-C<sub>4</sub>, aldehydes.

48. (New) The composition according to Claim 46, wherein the water or mixture of water and hydrophilic organic solvent(s) is present in an amount ranging from 0.1% to 90% by weight relative to the total weight of the composition.

49. (New) The composition according to Claim 32, further comprising a film-forming polymer.

50. (New) The composition according to Claim 49, wherein the film-forming polymer is selected from the group consisting of vinyl polymers, polyurethanes, polyesters, polyamides, polyureas, cellulosic polymers, and mixtures thereof.

51. (New) The composition according to Claim 49, wherein the film-forming polymer is present at a polymer solids content ranging from 0.1% to 60% by weight relative to the total weight of the composition.

52. (New) The composition according to Claim 32, further comprising a colorant.

53. (New) The composition according to Claim 52, wherein the colorant is selected from the group consisting of pigments, naces, fat-soluble dyes, water-soluble dyes, and mixtures thereof.

54. (New) The composition according to Claim 52, wherein the colorant is present in an amount ranging from 0.01% to 30% by weight, relative to the total weight of the composition.

55. (New) The composition according to Claim 32, further comprising at least one cosmetics additive selected from the group consisting of antioxidants, fillers, preservatives, perfumes, neutralizing agents, thickeners, surfactants, cosmetic or dermatological active agents, plasticizers, coalescents, and mixtures thereof.

56. (New) The composition according to Claim 32, wherein said composition is a makeup composition, a makeup base, a top-coat composition to be applied over makeup, or a keratin fibre care or treatment composition.

57. (New) The composition according to Claim 32, wherein said composition is an eyelash coating composition, a composition to be applied over an eyelash makeup, or an eyelash treatment composition.

58. (New) The composition according to Claim 32, wherein said composition is a mascara.

59. (New) A method for treating or making up keratin fibres, which comprises applying to said keratin fibres a composition according to Claim 32.

60. (New) The method according to Claim 59, wherein said keratin fibers are eyelashes.

61. (New) The method according to Claim 59, wherein said method volumizes said keratin fibres.

62. (New) The method according to Claim 60, wherein said method volumizes said keratin fibres.
